PROFILE

I'm a full stack developer who has rekindled a love of technology and dared to find a new career in the tech industry.
I enjoy the challenge of learning and the creative nature of web development.
I want to keep progressing my understanding of back-end and front-end within a good team of people.

PROFESSIONAL EXPERIENCE

Web Development | 2016-2017

General Assembly

- I developed projects using front-end and back-end technologies.
- I have worked with Git version control in group project work carried out.
- Used clear communication with project team for timely execution.
- Selected and used libraries in websites developed.

Export Coordinator | 2014-2016

GrainCorp Oils

- Managed relationships with many customers and internal stakeholders.
- Responsible for execution of contracts with time sensitive timeframes.
- Worked on IT projects, (MS CRM and BSM Global with specific focus on internal business unit requirements.

Grain Shipping Coordinator | 2010-2014

GrainCorp Operations Ltd - Marketing

- Developed and executed tactical plans and financial strategies for various shipments.
- Managed bulk shipment operations for global customers.
- Responsible for contract execution, including contract terms that required banking instruments (ie letters of credits).
